github.com/Istahak | Codeforces: Istahak16 (Max 1938, Candidate Master) | Portfolio: istahak.vercel.app

Education

University of Dhaka *Completed: February 2026*
Bachelor of Science in Computer Science and Engineering
CGPA: 3.80/4.0

Relevant Coursework: Data Structures, Algorithms, Web Development, Database Systems, Operating Systems, Computer Networks, Software Engineering, Machine Learning

Work Experience

Enosis Solutions BD ***March 2026 – Present***
Software Engineer

Enterprise cloud-based **dental practice management SaaS** for a US healthcare client, used by multi-location dental groups

- Investigated and resolved **critical production bugs** in the Reports, eSign and Clinical Notes modules, tracing root causes across the UI, backend services and SQL Server stored procedures
- Built an **AI-assisted bug-solving pipeline** using Claude Code custom skills and subagents: parallel investigation across three codebases, adversarial review of the root cause and regression impact, implementation, then automated PR creation and code review, with a human approval gate at every stage
- Follow an **AI-first development workflow**: custom AI skills and commands for investigation, code review and reporting, MCP integrations with Jira and Azure DevOps, and a living platform knowledge base that agents read and update
- Worked across the legacy ASP.NET Web Forms platform and the modernized ASP.NET Core application, keeping behavior consistent between them and preventing regressions in dependent modules
- Wrote and updated T-SQL stored procedures and delivered fixes through code reviews and Azure DevOps pull requests in a HIPAA-regulated environment

Technologies: C#, ASP.NET Core, ASP.NET MVC, ASP.NET Web Forms, Razor, AngularJS, jQuery, Microsoft SQL Server, Claude Code

Technical Skills

- **Programming Languages:** C#, C++, C, Python, Java, JavaScript, TypeScript, T-SQL
- **Frameworks:** ASP.NET Core, ASP.NET MVC, ASP.NET Web Forms, AngularJS, React.js, Node.js, Spring Boot, FastAPI
- **Web Technologies:** HTML5, CSS3, jQuery, Bootstrap, Razor, AJAX, RESTful APIs
- **Databases:** Microsoft SQL Server, MySQL, PostgreSQL, SQLite
- **Tools & Platforms:** Git, Azure DevOps, Jira, Visual Studio, VS Code, SQL Server Management Studio, Firebase, Linux
- **AI-First Development:** Claude Code, agentic workflows, custom skills and subagents, Model Context Protocol (MCP) integrations, prompt engineering
- **Others:** Data Structures & Algorithms, Problem Solving, Machine Learning (TensorFlow)

Achievements

- **Codeforces:** Handle: *Istahak16*, Rating: **1709** (Expert), Max Rating: **1938** (Candidate Master)
- **CodeChef:** Handle: *istahak_27*, Max Rating: **2020** (5-Star)
- **AtCoder:** Handle: *istahak_0*, Max Rating: **1571**

- **Contest Achievements:**
  - **5th Place** - ICPC Preliminary Dhaka Region 2025 with Team DU_Odyssey
  - **5th Place** - IUT 12th ICT Fest Inter University Programming Contest 2026 with Team DU_Artemis
  - **9th Place** - BUET Inter University Programming Contest 2026 with Team DU_Odyssey
  - **9th Place** - Samsung R&D Institute Bangladesh Code Contest 2025 (Onsite Round)
  - **6th Place** - CUET Inter University Programming Contest 2025 with Team DU_Odyssey
  - **6th Place** - DUET Inter University Programming Contest 2025 with Team DU_OBLIVION
  - **8th Place** - Uttara University Inter University Programming Contest 2025 with Team DU_OBLIVION

Research Experience

Spatial-Temporal Granger Causality in Event Sequences ***Ongoing***

Undergraduate Researcher, University of Dhaka

- Developing spatial-temporal Hawkes process extension with MLE-SGLP algorithm and event-region encoding for intra/inter-dependencies
- Validated on real-world datasets uncovering spatial propagation patterns for epidemics, crime, and social networks

Projects

FootpathEncroachmentBD - Urban Surveillance ML System ***2025***

Technologies: Python, TensorFlow, MobileNetV2, DenseNet121, CNN

- Developed CNN classification system achieving 99.02% accuracy (Custom CNN) and 90.67% multi-class accuracy (MobileNetV2) for detecting footpath encroachment in Dhaka
- Applied transfer learning with multiple architectures (MobileNetV2, DenseNet121, VGG16, ResNet50) addressing class imbalance
- Built automated surveillance pipeline supporting civic authorities in urban encroachment response

SeedHope - Fundraising Web Application ***2024***

Technologies: Java Spring Boot, TypeScript, React.js, PostgreSQL

- Developed Java Spring Boot backend for full-stack fundraising platform with campaign management, authentication, and donation processing
- Implemented RESTful APIs with real-time campaign tracking and payment integration
- Collaborated with frontend team delivering social impact features for Bangladesh community

Farmer Support Platform ***2023***

Technologies: Node.js, Python FastAPI, React.js, SQLite

- Built full-stack platform connecting farmers with experts using Node.js and Python FastAPI backend
- Implemented expert consultation, community forums, and farming calendar with frontend components
- Integrated weather API delivering location-based forecasts for data-driven farming decisions

Kodeshell - Competitive Programming Mobile App ***2022***

Technologies: Java, Android, RESTful APIs, Firebase

- Developed Android app consolidating Codeforces, CodeChef, AtCoder, and LeetCode with unified interface
- Implemented API integration fetching real-time profiles, ratings, and contest schedules with notification system
- Integrated community features for chat, posts, and competitive programming discussions

Extracurricular Activities

- **Competitive Programming Teams:** Active member of DU_Odyssey, DU_OBLIVION and DU_Artemis, competing in national and international contests
- **Problem Solving:** Solved 2000+ problems across Codeforces, CodeChef, AtCoder, and LeetCode platforms
- **Community Engagement:** Contributed to competitive programming community through Kodeshell app development
